TOOL@RREST
THE DROP STOPS HERE

OUR MISSION TO MAKE **WORK AT HEIGHT** SAFE...

Dropped tools cause serious or fatal injuries to innocent co-workers when working at height. For employers and clients, they also mean equipment damage, costly downtime, litigation, fines and loss of reputation.

'Self-tethering' (normally with rope, key rings or taped lanyards) is in itself is a major cause of incident as such solutions not industrially replicable or certifiable and have no mechanism for traceability or inspection. Until now, there has been no effective, certified and globally consistent method of tethering tools safely.

HOW BIG IS THE PROBLEM?

- Dropped objects tend to be the 2nd most common cause of workplace death in developed economies.
- The likes of the HSE (Work at Height Regulation 2005) and Safe Work Australia / Regulation 54 now require the risk of dropped tools to be eliminated and not just managed.
- Backed by serious financial / legal consequences on an individual and corporate level... in short, it's time to ACT.

OUR STORY

Tool@rest is a leading manufacturer of engineered, certificated solutions to prevent dropped tools in the global 'work at height' sector. Our systems centre around the creation of a patented tool tether.

- Independently tested, statistically fail-safe and fully certified.
- Uniquely capable of being retrofitted to nearly all new and existing hand tool stocks.
- For hand and power tools up to 2.5kg in weight.

Once tethered, a tool can now be securely attached to a lanyard which is anchored to an operative's tool belt or safety harness.

ANY TOOL, TETHER IT WITH TOOL@RREST™

- Certified and statistically fail-safe.
- Individually traceable and easily inspected.
- Fits in minutes, on-site or through a global network of certified agents.
- Part of a complete Tool@rest™ system for safe working at height (lanyards, tethered tool kits, bags, buckets, belts, holsters and power tool Wr@ps).
- Exceeds any and all current industry standards.
- Durable, pliable, non-intrusive.
- Compatible with new and tools already in use.

Industry leading solutions for eliminating dropped tools when working at height... Can you afford not to?

Why not email info@toolarrest.com now or call +44 (0)1952 292 782 and we'll help you get the right system for your business

Carefully constructed tool kits, complete with certified Tool@rrest™ tethers and lanyards provide a fully secure, tested and assured system to help eliminate dropped tools when working at height.

- Available in heavy duty mobile and static tool chest formats.
- Traceable, patented tool tethers applied to every tool.
- Premium quality tools for precision work and durability.
- Hammer and Electrical Extension Drawers available for all tool chests.
- Customisable drawers and tools to meet specific requirements.

MOBILE KITS

Secured in removable foam lined, waterproof, 'unbreakable' Peli cases.

Crane Maintenance Kit:	33 tools
Marine Tethered Kit:	54 tools
Offshore Training Kit:	30 tools
Tethered Land Rig Kit:	73 tools

Suitable for service companies working off site, such as on/off-shore drilling rigs. Easily transportable, immediate access to tools, industrial protection.

TOOL CHESTS

Secured in foam lined 6-drawer tool chest with forklift base for easy handling.

Derrick Maintenance Kit:	158 tools
Drillers Kit:	126 tools
Large Crane Kit:	99 tools
Mechanical Kit:	147 tools
Sub Sea Kit:	135 tools
Electrical Kit:	165 tools

Developed specifically for larger departments or fixed installations where greater tool choice trumps mobility.

BESPOKE KITS

Tool@rrest are able to provide fully customised tool kit contents and layouts to meet almost any application or need.

Mobile tool kits, Large tool chests, Mini tool boxes and Soft tool pouches/holders... Our bespoke matching and advice service cuts out unwanted tools, weight, costs whilst ensuring efficiency, usability and safety are maximised.

Further details for Bespoke Tool@rrest Tool Chests and Kits are available on request.

DROPPED TOOLS? NOW, THERE'S NO EXCUSE...

ANY TOOL, TETHER IT WITH TOOL@RREST™

The only certified tethering system that can be retrofit to your existing tool stock.

- No need to buy new kit.
- Can be retrofit in seconds on-site.
- Compatible with most hand tools.
- Guaranteed to exceed any and all industry standards.
- Exceeds employer 'Duty of Care'.
- Part of a complete solution for tool safety supplied by Tool@rrest.
- Available through a wide range of distributors globally.

If you have employees working at height, it is now your legal requirement to prevent objects falling, not simply to minimise damage if they do.

Dropped tools are a major cause of workplace injury and even fatalities in the UK. Until now, there's been no widely available, certified and tested technology to tether and secure your existing tools in every day use. You had to buy expensive, specialist new tools.

Not any more! With our Retr@fit service, most hand tools can be fitted with a fail-safe tether, onsite, anywhere in the country in seconds. This means your tools can now be used as part of a completely secure drop prevention system, using Tool@rrest lanyards, tool bags and PPE.
